Guwahati, Assam, India

EDUCATION

Manipal Institute of Technology

Bachelor of Technology in Computer Science & Engineering; CGPA: 7.65/10.0

Manipal, Karnataka, India

July 2024 – July 2028

The Assam Valley School

High School (12th Grade); ICSE; Percentage: 90.5%

Tezpur, Assam, India

April 2021 – April 2023

SKILLS

- **Programming Skills:** Java, C++, C, Python, JavaScript, Verilog HDL
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Web Development:** HTML, CSS, React.js, Node.js, Express.js, REST APIs
- **Cloud & Deployment:** Docker, Oracle Cloud Infrastructure (OCI), Vercel, Netlify, Supabase
- **Databases & Distributed Systems:** MySQL, PostgreSQL, MongoDB, Redis
- **Developer Tools:** Git, GitHub, Postman, VS Code, Cisco Packet Tracer, Power BI

EXPERIENCE

Universal Systems — Winter Intern

Dec 2025 - Jan 2026

- Developed a full-stack business analytics platform using React.js, Node.js, and MongoDB to centralize operational and financial data from multiple sources.
- Built automated ETL and analysis pipelines in Python to process and analyze 100,000+ records, reducing report generation time by 80%.

Froker — UI/UX & Frontend Development (Freelance)

May 2025 - July 2025

- Designed 25+ mobile and web interfaces in Figma, covering user flows, wireframes, and high-fidelity designs.
- Implemented frontend components using HTML, CSS, and JavaScript, ensuring responsive layouts and smooth user interactions and contributed to 15+ client projects improving user experience.

PROJECTS

NetSight AI

[Github Link](#)

- Architected a distributed NOC/SOC platform using React, FastAPI, PostgreSQL, Redis Pub/Sub, WebSockets, and Docker, supporting automated device discovery, topology visualization, security monitoring, and real-time analysis of 10,000+ telemetry events across 500+ network nodes.
- Built Scapy-based packet inspection, protocol analysis, threat detection, and attack simulation workflows, integrating an Ollama (Llama 3.1) AI Copilot for root-cause investigation and automated remediation recommendations.

VaaniPay

[Github Link](#)

- Developed a scalable voice-first banking IVR with Python (Flask) & Twilio API, enabling 7+ offline financial services for feature phones in 9 regional languages.
- Integrated Sarvam AI TTS to synthesize 260+ dynamic audio prompts, implementing secure stateful routing and RESTful APIs.

AeroHealth

[Github Link](#)

- Engineered an Azure-ready NLP triage engine categorizing patient symptoms across 11 medical departments and 5 urgency levels; developed a 6-variable predictive model forecasting 60-minute hospital capacities.

HONORS AND AWARDS

ACM Challenge Week Hackathon 2026 (Manipal) – 1st Place; developed VaaniPay, a multilingual voice-first financial assistance platform.

iDesign (TechTatva '25) – National-level Winner for designing an AI-powered in-car infotainment system.

Negative Space 2025 – 1st Place in IECSE UI/UX Competition for designing an AI-powered college discovery platform.

Microsoft India AI Unlocked 2026 – Selected among Top 250 participants nationwide.
